Ministry of Commerce

China on Wednesday decided to add US-based Compliance Testing LLC to its

countermeasure list and prohibit organizations and individuals in China from conducting any transactions, cooperation, or other activities with the company, China's Ministry of Commerce (MOFCOM) announced on Wednesday.

The decision was made in accordance with China's anti-foreign sanctions law and the regulation on implementing the law, according to a statement by the MOFCOM.

The US Federal Communications Commission (FCC) has intensively adopted measures against China, gravely violating the lawful rights and interests of Chinese companies. US-based Compliance Testing LLC had assisted and supported actions by FCC that undermines China's sovereignty, security, and development interests, according to the MOFCOM.

The countermeasures will take effect on August 5, 2026.
