Re: Notice to Arizona Board of Supervisors to Cease and Desist on the use of Voting Machines in the Arizona Elections

Dear Arizona Board of Supervisors,

This letter is served upon due to your intent to use unlawful voting machines in the upcoming elections ("Activity").
Here is a 3 hour plus video from the country's leading Subject Matter Experts on voting machines used for stealing elections. You were invited to this meeting pior to the 2020 election but chose not to attend. We have evidence of this invitation.
https://rumble.com/v1omeaq-voting-machines-are-corrupted-evidence-from-subject-matter-experts-do-not-u.html

You can no longer use plausible deniability. Ample evidence has been provided to be shared at future hearing if this Cease and Desist is not honored. Ignoring or avoiding the truth is not a defense.

If you do not agree to not use the voting machines a lawsuit will be commenced against you for violations of ARS Law, HAVA act, your oath of office the constitution and your duties and responsibilities in your elected position. You have violated the voting rights of our people to have a free and fair election and have refused to acknowledge the truth and your participation.

We hereby demand the voting machines, MCTEK, Runbeck all be eliminated from our elections process and propose the people in conjunction with the AZGOP and Maricopa County local church communities along with similar democratic offices to run the elections.

If you cannot provide physical evidence refuting these assertions that should be readily available on our Voting Systems which is deemed Critical Infrastructure by DHS CISA of the following on or before the demand date below;

[DHS CISA document]

https://www.cisa.gov/news-events/ics-advisories/icsa-22-154-01]

1) Test Reports showing the most recent testing on all the different voting systems configurations and their firmware being used in Arizona in the upcoming elections performed by properly accredited test labs, along with
2) Identifying the operating system of the voting system and the version of Microsoft being used.
3) The EAC accreditation certificates from properly accredited Test Labs showing ISO 17025 accreditation to perform voting machine testing on the lab's ISO scope of testing on the Lab's accreditation and the
4) EAC (Election Assistance Commission) accreditations certificates for any Test Labs that performed certifications on all Arizona voting systems including

5) The EAC documentation of their prior 3 assessments of the test labs that performed voting machine certification in Arizona.
6) A list of the Tabulators and Voter Registration system's firmware updates from prior to the 2018 election and the date of the firmware updates performed in all counties in Arizona on their voting systems.
7) The evidence in items 1 showing these voting system changes being properly tested in accordance with ARS 16-442B and the HAVA (Help America Vote ACT) to a relevant and up to date test standard that covers all aspects of the voting systems requiring testing.
8) All test reports from 2017 using an updated and proper testing standard which covers all the components of an entire voting system.
9) Any other information that would be related to testing Arizona Voting Systems, and the Test Labs that would be material to this Order.
10) The source code used on the machines.
11) Show the basis purpose for claiming the Logic and Accuracy test for "certifying" the voting machines and the certification authority of the people "signing" the supposed Logic and Accuracy Certification which is not a replacement for or adhere to the ARS and HAVA requirements.

There is much evidence revealing the voting systems have been proven to be able to connect to the internet and therefore make them hackable by outsiders over the internet. They have been documented by their manufacturer's operating manuals to be able to fractionalize ballots; meaning transfer a percentage of a vote for one candidate to another candidate. They have been shown to be able to transfer information to bad actors to determine the number of ballots submitted for a specific candidate to allow for additional ballots to be inserted into the elections and change an election outcome. This evidence substantial and is undeniable.

We restate that the logic and accuracy test does not properly test the voting machines in accordance with the law.

If the information requested above does not prove to the people of Arizona to whom the election belongs the voting machines are accurate; we will immediately seek a temporary restraining order in the District Court against you and any accomplices in this matter. We will also seek monetary damages to be shown at trial. Hopefully this recourse is not necessary. The people of Arizona have the authority under the Arizona Constitution to protect our elections and keep them free and fair meaning trustworthy and accurate and will vigorously do so. Also be noticed that the people also demand a hand count even if the machines are used as a safety measure for confirming the accuracy of the elections. To the extent that you can be held personally accountable, we intend to additionally seek for consequences in this regard.

You will not receive another warning letter. If you do not confirm in writing to us by the 08/09/2024 that you will cease from using unlawful voting machines or provide the information requested in the upcoming elections violating the laws addressed above a lawsuit will be commenced.

From Arizona Constitution

ARTICLE VII. SUFFRAGE AND ELECTIONS

1. Method of voting; secrecy

Section 1. All elections by the people shall be by ballot, or by such other method as may be prescribed by law; Provided, that secrecy in voting shall be preserved.

INTENTIONALLY LEFT BLANK

7. Highest number of votes received as determinative of person elected

Section 7. In all elections held by the people in this state, the person, or persons, receiving the highest number of legal votes shall be declared elected.

Sincerely,

Michael Schafer
